1014

This book is a computer-generated index of the 1860 Butte County California Federal Census. A special thank-you to Stella Rookaird who transcribed and indexed all of the listings from the original microfilm records in preparation for publication. Over 8,500 individuals are listed on the following pages.

HOW TO USE THIS INDEX

Because genealogy is about families, this index has kept together family members of each household, with the same surname.

First, the family surname is shown in capital letters, below that, the microfilm page number. Next, the given name or initial(s), age and place of birth in the same order as they appear on the original census documents. Given name or initial(s) of others with the same family surname living in the same household are listed on the next line(s).

When only initials are given, an asterisk indicates that person is a female.

The microfilm pages are numbered in two sections. The first section has pages 1 through 144. The second section is numbered 1 through 166. To differentiate between the two sections, the letter 'b' has been added to the numbers in the second section i.e., 1b follows 144.

A list of the country (place of birth) abbreviations used here follows this page.

Due to the difficulty in deciphering some of the handwriting of the enumerators, the accuracy of the spelling in this index is not guaranteed. We have made a best effort attempt. Unreadable names/listings are followed by a question mark (?).
