## CALIFORNIA

### FUNERAL BOOK

#### 1877 - 1896

This booklet is a transcription from the original Funeral book that is now at the Merced County Historical Museum located at 21<sup>st</sup> and M Streets in Merced, California. At this time, it is not known if this was the record of one funeral home, or a record of all funerals held in the county. The cemetery of burial is listed, and they are throughout the county, with some in Mariposa county. The book was saved from destruction several decades ago by a history minded individual. This book was kept before deaths certificates were required in the county. This information is the only record of these deaths that are known during this early era and could have been easily lost if this book had not been saved. The CORONER'S BOOK started in 1883 and several of the entries appear in both books. Recently this book was given to a local genealogy society member and was subsequently donated to the Merced County Historical museum. We thank this individual for saving this valuable piece of history for us.

The next column lists the Doctors shown in the book. Most of these were shown with Dr. before the name or MD following the names.
